

As PUKKA, we serve in the construction, oil and energy sectors, which are the locomotive sectors of the regional economy. Today, information age requirements are being felt very intensely. Managing technology and time has become a very important element. The fact that the companies serving in the sectors keep up with the change has been an inevitable fact for their sustainability policies. In this respect, it is not possible for companies to maintain and develop their assets only by working and producing. The competitive element and the cartelization in the sectors bring about difference and continuous change.

These changes in the global market are well understood and adopted by our company. Therefore, our company is not based on document-based quality understanding; is based on unconditional employer satisfaction by creating a whole with products, markets and human factors.

- o Turkish Confederation of Businessmen and Industrialists

PUKKA History:

The history of construction for the PUKKA Company begins with Hamdi ABLAK's contracting work in the 1960s. Hamdi ABLAK started to tend tenders with the company. By making infrastructure projects, bridges, health centres and schools, it has become one of the leading contractors in Corum-Turkiye.

2nd generation Erol ABLAK, continued his father's career when he graduated from Civil Engineering in 1983. He started her business life with the activities of Balıkesir-Susurluk Sugar Factory and Balıkesir-Bigadic Irrigation Facilities. He has realized many public housing projects and corporate auctions in her professional life. He still continues his career as an expert in public opinion in Balıkesir-Burhaniye.

3rd generation Hamdi Erdem ABLAK, took over the business in 2003 from Erol Ablak. Continuous improvement in the direction of change and development in the sector, has opened the first building test laboratory in the Balıkesir region. He took on the regional representation of corporate firms and started to provide services in many fields. After completing the renovation work at Ayvalık Vakıfbank Training and Recreation Facilities in 2008, he started his first overseas work in 2009 by establishing ERA Engineering Company in Pristina-Kosovo. Between 2009 and 2011, he successfully delivered the works of various public institutions in Turkey and abroad.

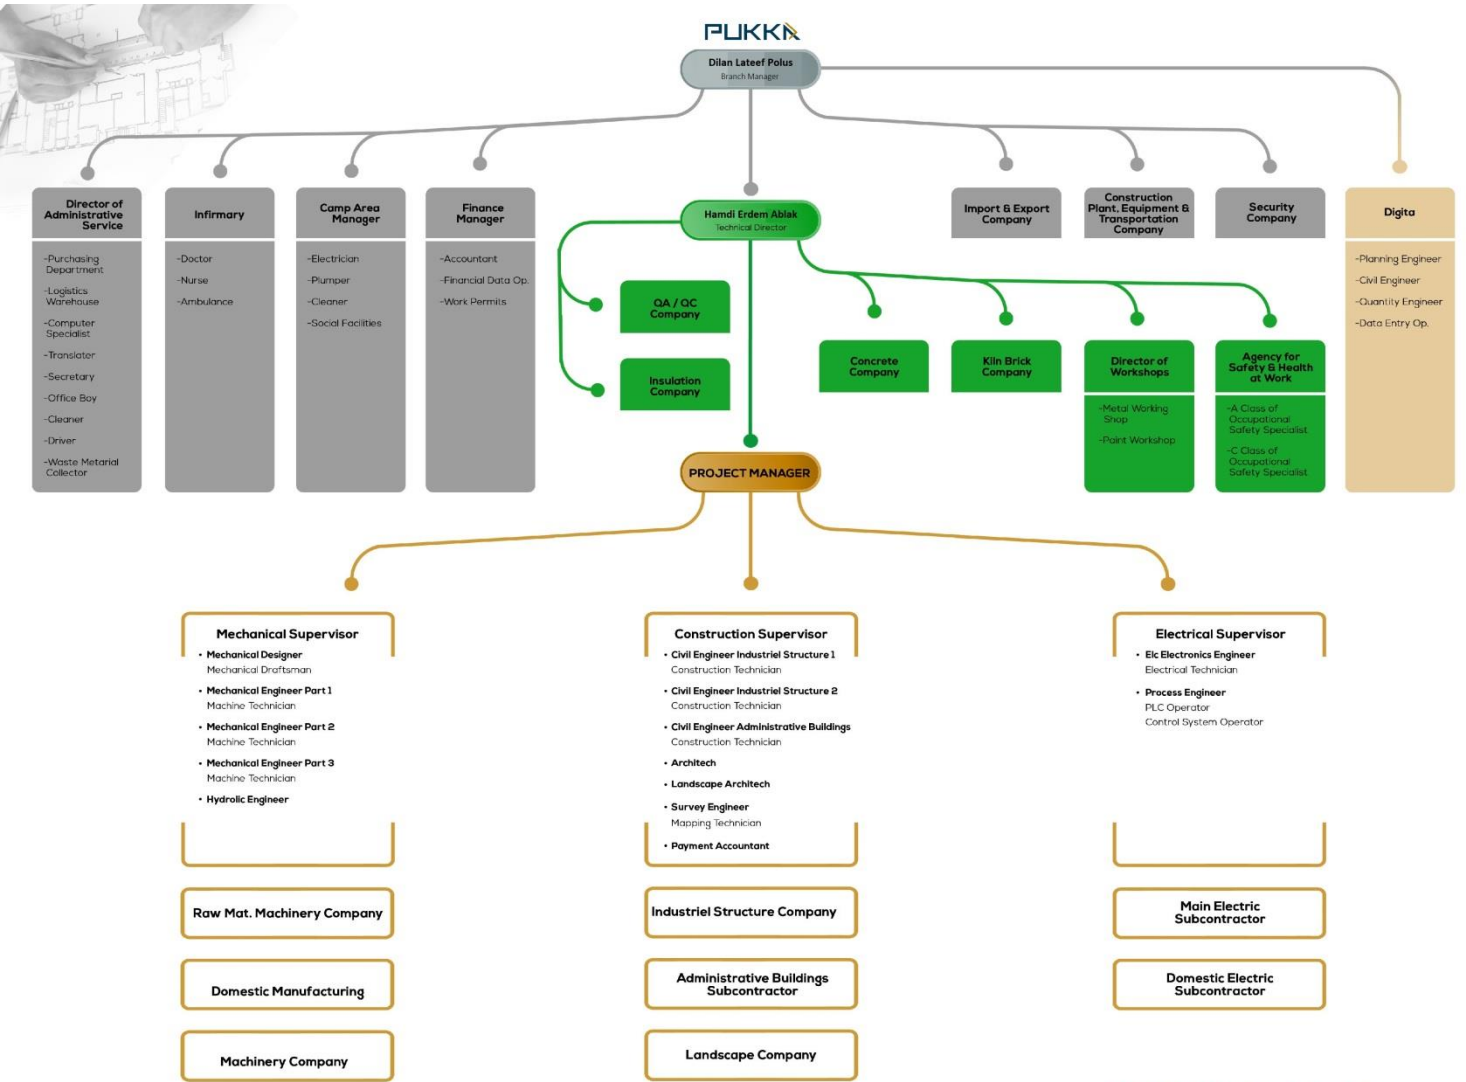

In 2011, they successfully delivered the PUK Party Headquarters Building in Iraq. In order to maintain stability in the region, they decided to partner with Civil Engineer Dilan Lateef Polus. In 2013, they established PUKKA CONSTRUCTION.

Pukka Construction has taken all the necessary legal permits to operate in the oil operation areas in the region. Genel Energy, Petoil, serves the largest oil companies in the region. It has been working in oil fields for 5 years with its team of experts on oil and pipeline equipment and industrial structures.

Pukka Company has completed all the financial, human resources and technical infrastructure necessary to be one of the strongest companies under today's competitive conditions. PUKKA Company further strengthened relations with government agencies and private institutions at home and abroad. The company is taking firm steps towards achieving its growth targets with its young and strong technical staff.

Perhaps a life-time may not be enough to make dreams come true, but every step-in dream brings future generations to dreams.

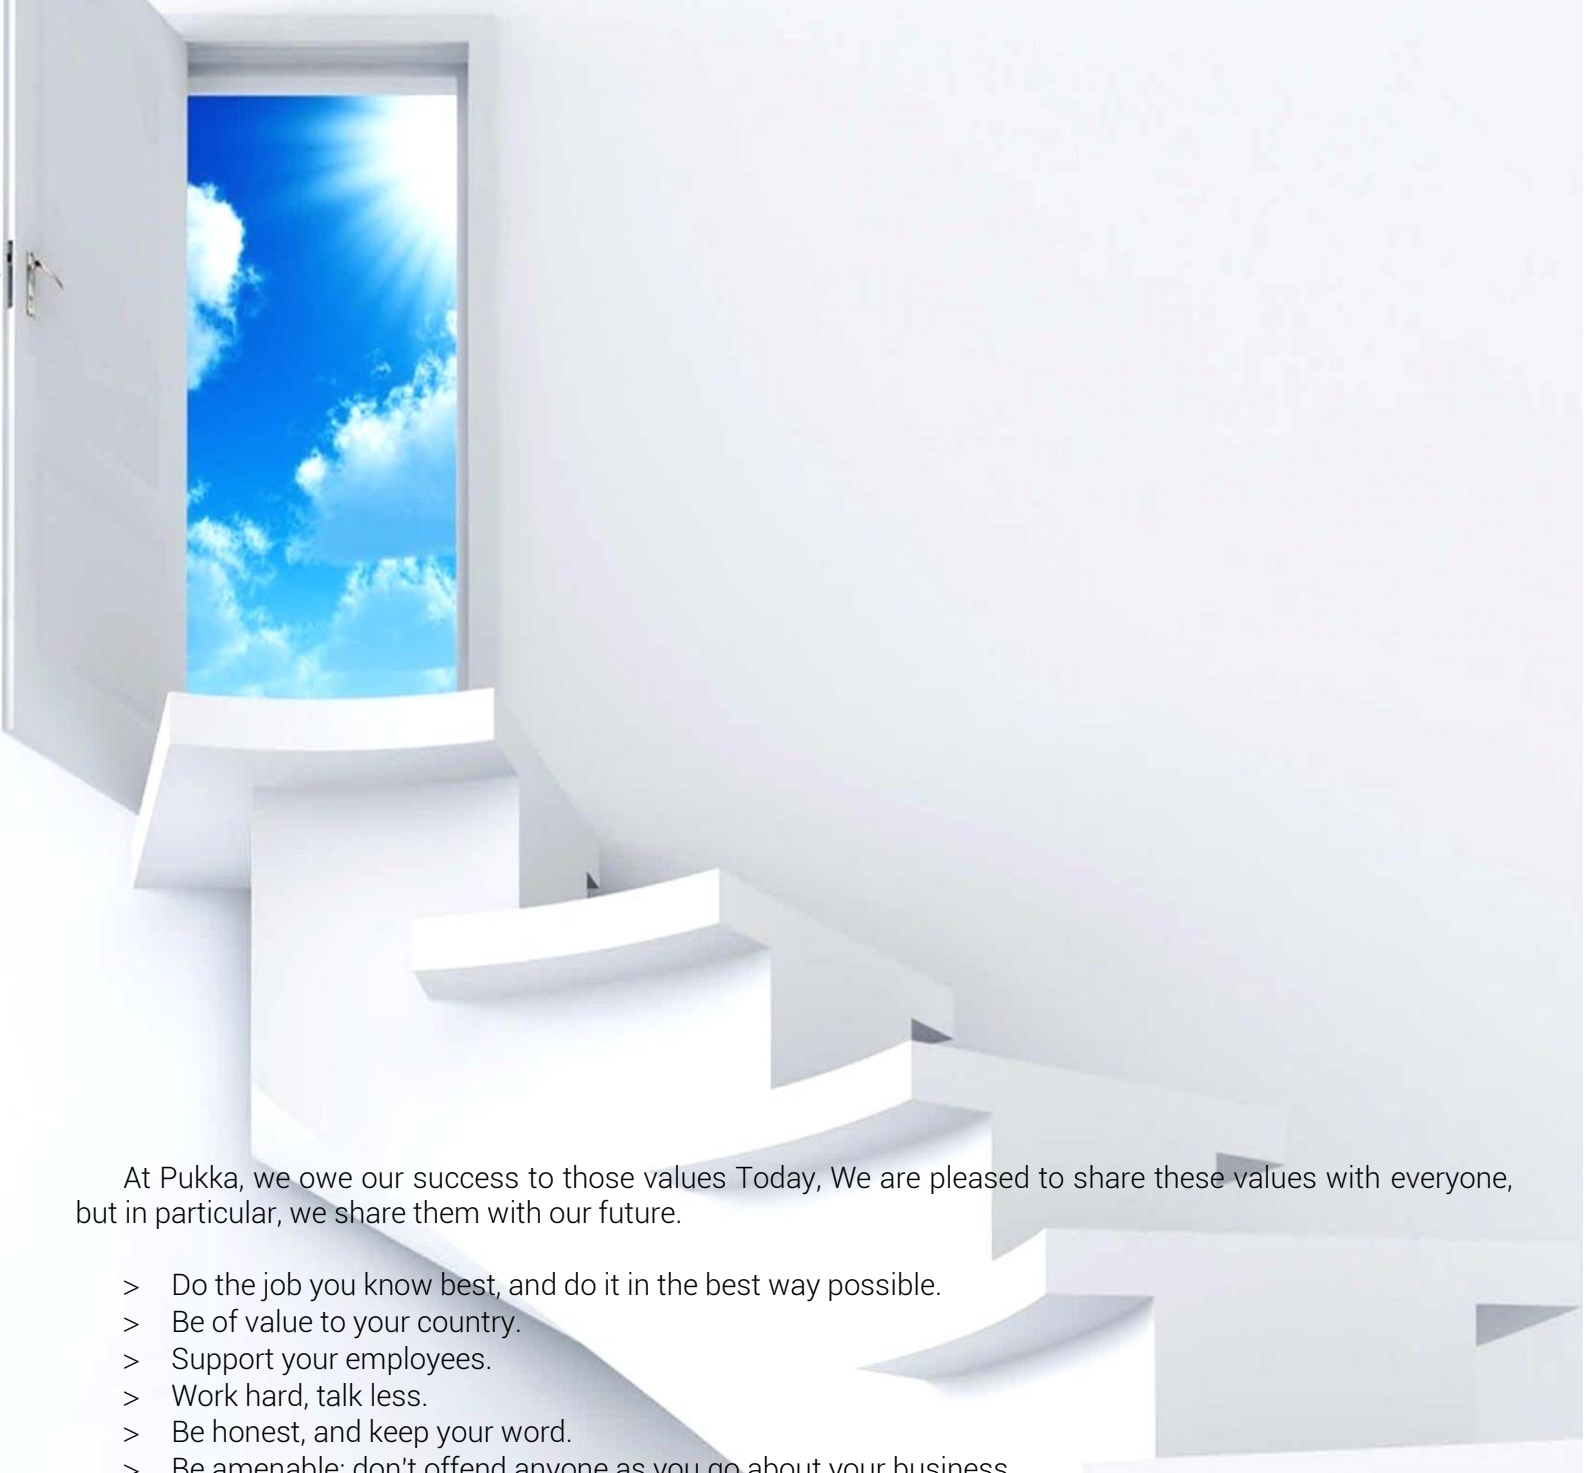

The management of PUKKA Company is held once a year to determine the sustainability issues that have strategic priorities, and the senior management meeting is held and priority issues are determined. When priorities are set; expectations and demands of partners through various channels, sectoral global developments, and strategic objectives are taken into account and priority issues are updated.

Sustainability issues that we have identified as PUKKA Company include:

- > Digitalization
- > Our Sectoral Recognition
- > Regional Risk Analysis
- > Potential Capabilities
- > Financial Capabilities
- > Our Renewable Energy Resources Portfolio

At Pukka, we owe our success to those values Today, We are pleased to share these values with everyone, but in particular, we share them with our future.

- > Do the job you know best, and do it in the best way possible.
- > Be of value to your country.
- > Support your employees.
- > Work hard, talk less.
- > Be honest, and keep your word.
- > Be amenable; don't offend anyone as you go about your business.
- > Do not let ambition get the best of you.
- > Believe in technique and knowledge.
- > Conserve nature and protect your fellow employees.

The best guarantee of a company's profits both today and tomorrow is to always ensure the satisfaction of your customers and your employees.

At Pukka, in all our endeavors - towards our workers, towards the third parties we deal with, towards our products and in order to minimize the effect on the environment - we make it our work principle to:

- > Expect our managers and employees to be responsible for and adhere to all laws and regulations regarding health, safety, the environment and quality.
- > Follow the standards and customer agreements, to keep customer complaints as low as possible, to limit repairs and the repetition of errors, and to pass this on to the customer as cost effectively as possible.
- > Improve the effectiveness of our management system, and to continuously track and improve our practices.

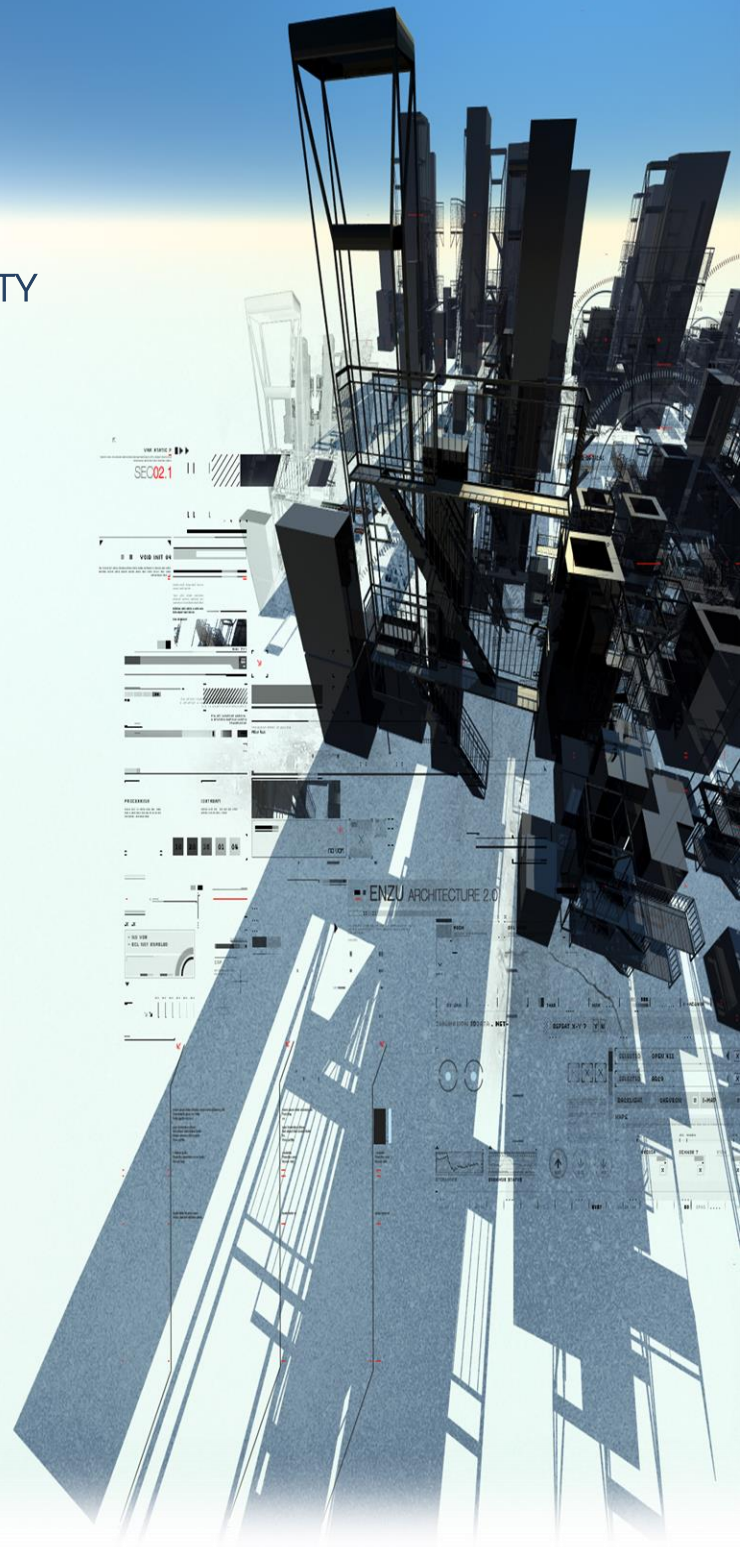

Social Responsibility:

- > Pukka construction pays attention to maintain adverse effects in a minimum level for environmental health in the projects. Energy use of heating, ventilation and air conditioning systems at an optimum level in buildings is providing by using Building Management Systems.
- > Health and safety of employees is one of the most important principles of the ethical approach of Pukka Construction. Continuous works are performed for providing that occupational health and safety is an integral part of all business processes and corporate culture.
- > Pukka Construction is made important contributions to both the national economy and the economy and people of countries in which making activities by domestic and overseas employment as well as social responsibility projects.
